

VBR 01 - BRACCIO ROVERSCIO

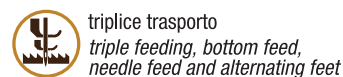

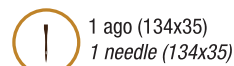

VBR 01

Macchina a braccio rovesciato, un ago, triplice trasporto, punto annodato. Grazie alle ridotte dimensioni del diametro del braccio, consente la cucitura di tubolari e filtri, oltre a calzature e pelletteria in genere.

VBR 01

Feed-off the arm machine, single needle, bottom feed, needle feed, alternating feet, lockstitch.

Designed according to a very new concept, it allows stitching of tubular particulars and filters, shoes and leather goods in general, thanks to the reduced dimensions of arm.

Lunghezza braccio 260 mm

Per particolari esigenze la lunghezza del braccio può variare dietro richiesta

Diametro braccio 50 mm

Velocità massima cucitura 1600 rpm

Possibile versione braccio 400 mm

Arm length 260 mm

For particular requirement the arm length can vary on previous request

Arm diameter 50 mm

Sewing maximum speed 1600 rpm

Possible version arm 400 mm
